

live power line detection

power line & obstacle detection safety systems

D-TEC II

The D-TEC II safety unit provides overhead power line and obstacle detection and above the mast illumination. The anti-collision system automatically stops

mast extension, providing added protection from overhead hazards for the operator and equipment. The D-TEC II safety system is available on the Nightscan 3000, Nightscan 4500, and the Nightscan Vertical Light Tower.

D-TEC II Safety Features:

- Look-up light illuminates area directly above telescoping mast
- High-voltage sensor aids operator in detecting overhead power lines
- Anti-collision sensor automatically stops mast extension when overhead obstructions are detected
- Factory pre-set sensitivity setting

Detection	E-field and H-field detection
Look-up Light	2-3 watt LED light
Anti Collision Sensor	10 ft. proximity
Tilt warning Sensor	Senses tilt of 10° or more from vertical
Power Requirements	12-24 V
Environmental Conditions	Sensor IP67, Control IP65

live downed power line detection

TAC Stick

Day or night, TAC Stick helps keep you safe. Simple to use, this lightweight, hand-held AC current-sensing device can enable you to sense AC current from near and far. TAC Stick has three settings- high sensitivity, low sensitivity and front focused.
